PROFESSIONAL SUMMARY

Computer Science graduate (MSc, 8.39 CGPA) with hands-on experience building web applications and NLP tools using JavaScript and Python. Certified in Full Stack Web Development and AWS Cloud Essentials, with practical knowledge of REST APIs, frontend development, and data processing pipelines. Quick learner with a strong problem-solving foundation, seeking a developer or analyst role to contribute from day one.

EDUCATION

Master of Science in Computer Science <i>Mumbai University – Thakur College of Science & Commerce CGPA: 8.39 / 10</i>	April 2026
Bachelor of Science in Computer Science <i>Mumbai University – Thakur College of Science & Commerce CGPA: 9.00 / 10</i>	March 2024
HSC – Science Stream <i>Sathaye College 85.33%</i>	May 2021
SSC <i>AGHS 94.40%</i>	March 2019

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, HTML5, CSS3
Web: REST APIs, Fetch API, JSON, Responsive UI Design
Data / NLP: Text processing, summarization pipelines, PDF parsing
Cloud: AWS (Cloud Practitioner certified)
Tools: Git, GitHub, VS Code, Postman
AI Tools: ChatGPT, Claude, Google Gemini, AI-assisted development, Prompt Engineering
Coursework: Full Stack Web Dev (MERN), Android with Kotlin (IIT Bombay)

PROJECTS

<u>Text Summarizer</u> — Python / NLP	2025
- Built an NLP-based summarization tool that condenses large documents, PDFs, and webpages into concise summaries using extractive techniques. - Handles varied input formats and preserves key information, reducing reading time by approximately 70%. - Tech: Python, NLTK / spaCy, PDF parsing libraries	
<u>Chef At Home</u> — JavaScript / REST API	2024
- Developed a recipe search and meal-planning web app integrating a third-party recipe API with dynamic ingredient scaling based on serving size. - Implemented clean, responsive UI with intuitive navigation and step-by-step instruction display. - Tech: Vanilla JavaScript, Fetch API, HTML5, CSS3	
<u>Splitzy</u> — MERN Stack / REST API	2026
- Built a full-stack expense-splitting web app with group management, expense tracking, and comments, using a settlement algorithm to minimize the number of payments needed to clear balances - Implemented JWT authentication and RESTful APIs (Node.js/Express/MongoDB); deployed on Render and Vercel - Tech: React, Node.js, Express, MongoDB, JWT	

RESEARCH

<u>Edge AI: Deploying Machine Learning Models at Network Edge</u>	2026
--	------

- Studied techniques for running ML inference at edge devices to reduce latency and cloud dependency — relevant to IoT and real-time processing applications.
